```
6 (Form (?? 'q1 "1: Booelan" Boolean)
7       (?? 'q2 "2: Number" Number)
8       (~? 'q3 "3= $1 - $2: ERROR"
9            (~~ - (~> 'q2) (~> 'q1))))
```

(a) erroneous questionnaire
(subtracting from a Boolean value
is a type error)

not well-formed warning
The questionnaire can still
be used. Computations are
performed; computations on
undefined yield undefined. In
group conditions, undefined
is treated as *false*.
